SUMMARY

Final-year Computer Science Engineering student with hands-on experience in backend engineering, containerization, and CI/CD automation using AWS, Terraform, Docker, and GitHub Actions. Strong foundation in Data Structures & Algorithms and core CS fundamentals, with practical experience building and deploying full-stack applications. Seeking entry-level opportunities in Software Engineering and Cloud/DevOps.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C

Cloud & DevOps: AWS (EC2), Terraform(Basics), Docker, GitHub Actions, CI/CD, Microsoft Azure (AZ-900, DP-900 certified)

Databases: MySQL, MongoDB

Backend: FastAPI, REST APIs

Frontend: React.js, HTML5, CSS3

Tools: Git, GitHub, Linux, VS Code

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

LegalEase AI | [GitHub](#) | [LIVE DEMO](#)

FastAPI, Next.js, Grok API, Docker, GitHub Actions

- Developed a full-stack AI platform for legal document analysis, supporting summarization, risk detection, and question answering.
- Built REST APIs with FastAPI and Pydantic, implementing PDF extraction, OCR fallback, document chunking, caching, rate limiting, and structured error handling.
- Integrated the Grok API for contextual legal analysis and grounded Q&A using relevant document content and citation snippets.
- Containerized the backend with Docker and configured GitHub Actions CI, Prometheus metrics, and cloud deployment support.

Automated Cloud Deployment Platform | [GitHub](#)

FastAPI, PostgreSQL, Docker, Terraform, AWS EC2, GitHub Actions

- Containerized a FastAPI + PostgreSQL backend with Docker Compose, standardizing application and database environments across development and production.
- Automated AWS EC2 provisioning with Terraform (IaC), replacing manual infrastructure configuration with a reproducible terraform plan → apply workflow.
- Engineered a GitHub Actions CI/CD pipeline for automated testing, Docker image builds, SHA-based versioning, deployment, and post-deployment health-check gating.
- Implemented immutable, commit-traceable deployments with automated health validation, providing a reliable mechanism to verify each release before considering it successful.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) | [LINK](#)
- Microsoft Azure Data Fundamentals (DP-900) | [LINK](#)

EDUCATION

Rajeev Gandhi Memorial College of Engineering and Technology, Nandyal

2023 – 2027

Bachelor of Technology in Computer Science & Engineering

CGPA: 8.70/10
